

PRODUCT INFORMATION PAGE

GRES PROTECTOR

HYDROPHOBIC AND OLEOPHOBIC

PROPERTIES:

Fast penetrating, oleophobic and hydrophobic impregnator of high-quality used for protecting polished and unpolished gres surfaces. Especially recommended for surfaces exposed to staining with oil, water, grease, or other pollution. It protects and makes the surface easier to clean up afterwards. For indoor and outdoor use. The product is ready for use. It contains organic solvents.

INSTRUCTIONS:

The surface for impregnation must be dry, dusted and free of any traces of calcium and cement residues. Depending on the type of dirt, it is best to use one of the cleaning agents made by Renove. Follow the directions carefully and try it in a less-visible place first. Put on a thin coat evenly on to the surface using a sponge or a soft cloth, and leave it to be absorbed. Apply on a smaller section of the surface to ensure that any excess can be spread. We recommend to put on two layers with 2 hours between coats. The full protection efficacy is achieved after 24-48 hours. For regular care of the impregnated surface, use the gres tile cleaning agent by Renove.

WARNINGS:

Avoid leaving excess of the product on the surface. The impregnator should be absorbed by the surface, avoid leaving it to dry out.

HINTS:

Keep away from children.

EFFICIENCY:

Up to 20m²/1L

EXPIRATION:

24 months from the production date on the packaging

PACKAGE SIZE: 1L**STORAGE:**

The product should be stored in the unopened, original packaging in a dry area at a temperature of +5°C to +25°C
