

PRODUCT INFORMATION PAGE

COLOUR INTENSIFIER FOR STONE SURFACES

PROPERTIES:

The product deepens and intensifies colour, as well as highlights the natural and artificial stone texture. It protects the surface from water penetration and dirt. It creates the "wet stone" effect. After applying the product, colours become more distinct and the surface looks refreshed and cleaned. Recommended for smooth or rough, absorbent or non-absorbent surface types of natural stones, like marble, sandstone, granite, concrete, terrazzo and slate. For indoor and outdoor use.

INSTRUCTIONS:

The surface for impregnation must be dry, dusted and free of any traces of calcium and cement residues. Depending on the type of dirt, it is best to use one of the cleaning agents made by Renove. Follow the directions carefully and try it in a less-visible place first. Apply the product evenly with a sponge or a soft cloth. Put on the impregnator on a smaller section of the surface to ensure that any excess can be spread before drying. Remove excess sealer with a dry cloth. For regular care of the impregnated surface, use the marble cleaning agent by Renove.

WARNINGS:

The product is optimised for use at a minimum temperature of +10°C to +25°C. Avoid using during rain.

HINTS:

Keep away from children.

EFFICIENCY:

About 10-20m²/1L depending on the stone type and its absorptivity.

EXPIRATION:

24 months from the production date on the packaging

PACKAGE SIZE:

500ml, 5L

STORAGE:

The product should be stored in the unopened, original packaging in a dry area at a temperature of +5°C to +25°C
