PRODUCT INFORMATION PAGE

EFFLORESCENCE REMOVER

PROPERTIES:
A powerful and effective cleaning agent for eliminating white staining, as well as for removing cement residues and other stains from clinker bricks, clinker and semi-clinker tiles.
The efflorescence remover will also get rid of mortars and any residue remains. Do not use on non-acid resistant surfaces, such as sand-lime bricks.

INSTRUCTIONS:
Depending on the degree of dirtiness, the product should be diluted in a ratio of 1:4 up to 1:20 using water. Follow the directions carefully and try it in a less-visible place first. We advise to use the product on the surface moistened with water. For difficult grime, dissolve the efflorescence remover in hot water. Apply the product on the dirty surface and leave it for a while. Scrub thoroughly with a brush and rinse with water afterwards. For especially difficult grime, repeat the procedure. For indoor and outdoor use. For protection against moisture, dirt, stains and white efflorescence, we recommend the clinker impregnator by Renove.

WARNINGS:
Use rubber gloves and safety glasses. The product should not come into direct contact with any metal elements.

HINTS:
Keep away from children.

EFFICIENCY:
20-40m^2/1L depending on the degree of dirtiness.

EXPIRATION:
24 months from the production date on the packaging

PACKAGE SIZE:
3kg

STORAGE:
The product should be stored in the unopened, original packaging in a dry area at a temperature of +5°C to +25°C

For difficult problem-solving questions, or products with special requirements, which are not covered by this technical card, we assure all our clients of our professional consulting services. Upon issue of a new technical card, the present one will no longer be valid
